Sammer Sheikh

Full-Stack Engineer
Dublin, CA • 209-221-9550
sammer.sheikh@outlook.com • LinkedIn • GitHub

Full Stack Developer with hands-on experience designing, developing, and
implementing applications and solutions using Full-stack development. Passionate about building things and solving problems
for people through programming.

Skills

Languages | HTML, CSS, JavaScript, Python
Libraries and Frameworks | React, Node.js, Express.js, Django
Database | PostgreSQL, SQL, MongoDB, Mongoose
Other | RESTful Routing JSON
Process | Test-driven development

Relevant Professional Experience

Workday | Pleasanton, CA
Software Engineer   July 2019 – Dec 2021

- Debugged and developed financials software through Object-oriented programming using Workday's proprietary software language Xpresso
- Worked on Web Services and tested through SOAP UI
- Participated in agile methodology on 6 month feature teams
- Solved and fixed customer bugs regularly while working on Product Support team
- Automated user stories and test cases through WATS, Workday's proprietary automation software language

Projects

codealot | Minimal StackOverflow
JavaScript, Node.js, Express.js
                                                                          March 2022
- Created a minimal stack overflow web app where developers can ask questions about their code and make relevant posts for other developer to interact with
- Implemented a custom Dark mode feature using jQuery and the Web Storage API
- Utilized NoSQL database MongoDB and Mongoose ODM library to interact with data models
- Used authentication API OAuth to allow users to sign in with their Google accounts and utilized authorization to limit user and non-user functionality

Twitter Watcher | Utilized Twitter API to show top trending topics and allow user to see tweets for each topic using Django
Connect Four | Game with win/loss logic
Stickman | Game with win/loss logic

Education

General Assembly – Remote   March 2022 – May 2022 [anticipated]
- Built client-side applications with responsive behavior using HTML, CSS, JavaScript, and React
- Developed 4 full-stack web applications in four days sprints independently and collaboratively while practicing Agile methodology. Utilized Git for version control and MVC for design
- Completed 12 weeks/500+ hours of intensive Full Stack Development instruction

Year Up – San Francisco   March 2019 – Jan 2020

- Completed coursework in Professional Development

Computer Science – University of California Merced   Jan 2017 – Aug 2018
- Completed 5 semesters of computer science courses
