

# SAMMER SHEIKH

## Senior Technical Product Specialist

Pleasanton, CA • sammerahmadsheikh@outlook.com • linkedin.com/in/sammersheikh

### PROFESSIONAL SUMMARY

---

Results-driven Senior Technical Product Specialist with 5+ years bridging engineering, product, and operations in regulated and high-growth environments. Proven track record of owning end-to-end release management, driving regulatory compliance (MDSAP/QMS), and building automation systems that scale. Leverages AI-augmented workflows (Claude Code, OpenAI Codex, Obsidian knowledge systems) to accelerate development velocity and maintain comprehensive technical documentation.

### EXPERIENCE

---

#### RadiusXR® — Pleasanton, CA

*XR and low vision medical device company*

##### Senior Technical Product Specialist

*Mar 2025 – Present*

- Lead cross-functional product initiatives across engineering, clinical, QMS, and external advisors, driving full lifecycle feature development for the Radius XR platform
- Own release management end-to-end, including commercialization templates, UAT process design, and go/no-go coordination for medical device software releases
- Architect Business Requirement Documents (BRDs) for major platform features, translating clinical needs into technical specifications with implementation roadmaps
- Spearhead MDSAP audit readiness by migrating QMS documentation to GreenLight Guru and coordinating CAPA/NCR compliance across departments
- Build real-time operational dashboards integrating Zendesk, Mixpanel, and Salesforce data to surface support metrics and product analytics company-wide
- Leverage AI-assisted development (Claude Code, Codex CLI) to rapidly prototype features and automate workflows; maintain Obsidian-based knowledge management system for requirements tracking and institutional memory

##### Technical Product Specialist

*Jul 2024 – Mar 2025*

- Spearheaded end-to-end development of automated Onboarding Registration flow integrating parameterized URLs with Salesforce; reduced customer support calls by over 80% and secured strategic partnership with Topcon
- Engineered comprehensive Inventory and QMS tracking system for Class 1A Medical Device using Google Apps Script; enabled shipment of 1,000+ units in 6 months, increased on-shelf inventory 10x, boosted weekly revenue potential by ~\$100k-\$150k
- Architected automated workflow for single-unit shipments by integrating Salesforce API with FedEx API for auto-generated shipping labels
- Owned device release management strategy for 4,000+ Android devices; led development of automated release application using Knox Manage APIs, cutting management time by over 90%
- Orchestrated business requirements and cross-team alignment (Product, Design, Development, Management) for platform enhancements including subscription-based feature model and tablet-based onboarding application

#### Vagaro — Dublin, CA

##### Software Support Engineer

*Dec 2022 – Jun 2023*

- Resolved 25+ complex software issues weekly using log analysis and remote desktop tools, providing same-day workarounds and coordinating hotfixes with development teams
- Diagnosed and architected solution for critical intermittent bug in payment processing module affecting transactions, preventing potential revenue loss
- Developed Python automation scripts to generate contextualized response templates from ticket content, increasing agent ticket resolution capacity by 30%

- Optimized database performance by refactoring critical SQL queries for appointment scheduling, reducing average query execution time by 40%

## **Workday — Pleasanton, CA**

### **Software Engineer**

*Jul 2019 – Dec 2021*

- Developed feature using Xpresso that automated supplier invoice approval workflow with integrated messaging; decreased average pending invoice duration by 25% and increased on-time supplier payments
- Created comprehensive automation suite with Xpresso scripts to test proprietary language code, improving code quality and reducing pre-production bugs by 15%
- Collaborated with cross-functional teams to design database schemas and optimized queries, enhancing data accessibility for Financial Supplier Accounts module

## **SKILLS**

---

**Product & Process:** Release Management • Business Requirements Documentation • UAT • Cross-Functional Leadership • Product Analytics • Agile • Stakeholder Management

**Technical:** JavaScript • Python • SQL • Google Apps Script • Salesforce • React • Node.js • MongoDB • Knox MDM • PowerBI • Linux • Git • JIRA

**Medical Device & QMS:** Quality Management Systems • GreenLight Guru • MDSAP Compliance • CAPA/NCR Management • FDA Regulated Environments

**AI & Productivity:** Claude Code • OpenAI Codex CLI • Obsidian (Second Brain/PKM) • AI-Augmented Development • Prompt Engineering

## **EDUCATION**

---

**Western Governors University** — B.S. Business – IT Management | *Expected 2026*
